

IS 1109 - Individual Contribution

Index No - 22020357

Reg No- 2022/IS/035

Name - INDUPA N.H.L.L.

I contributed to this group project by developing the “Contact Us” page (including footer) combining HTML, CSS, JavaScript and PHP. In order to contribute to the overall success and functionality of the online cab service system, I tried to ensure a smooth connection between the user interface and backend systems.

Contact Us Page

- Developed the structure and layout of the Contact Us page using HTML, ensuring proper accessibility.
- Implemented form elements such as input fields, text areas, and buttons for user interaction.
- Styled the Contact Us page using CSS to enhance visual appeal and ensure consistency with the overall website design.
- Included JavaScript to validate form inputs client-side, making sure user-provided data satisfies requirements before submitting.
- Integrated PHP to handle form submission and processing, enabling communication between the front-end and back-end of the system.
- Included a google map location and all the contact details of the company for the convenience of users.

Footer

- Included a brief description about the company and the necessary contact details of the company.
- Contributed to the overall professionalism and credibility of the page through the design and content of the footer section.
